

The Climate-KIC from a LU educational perspective

Håkan Rodhe
Assoc. Prof at IIIEE

What does the KIC mean to LU students

For Master & PhD students

- Climate KIC summer schools
- Climate KIC labelling of the degree
- Greenhouse programme for business ideas

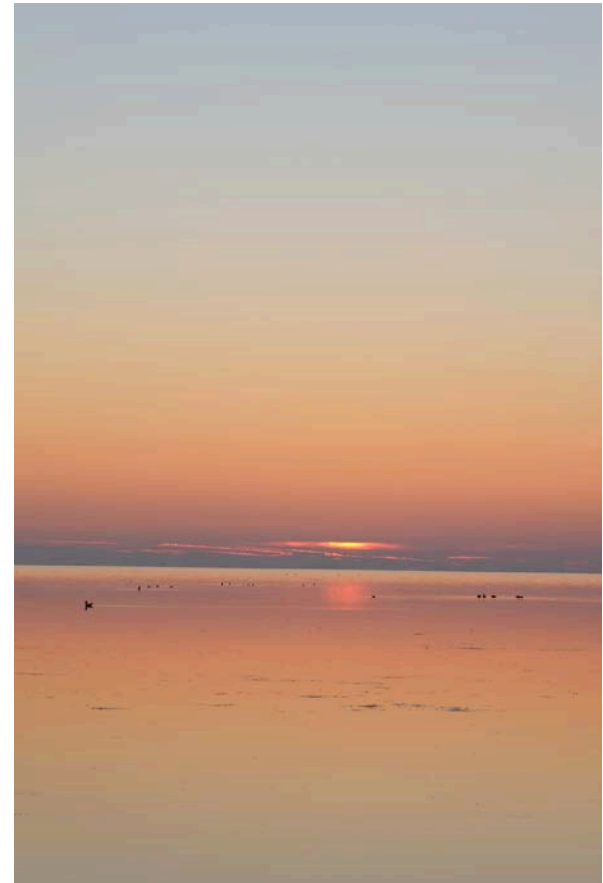

KIC summer school Aug 2015 – the Journey

- Two weeks out of five in Lund
- Ambitious programme with classes, study visits, assignment working time, social activities
- Ca 40 students, international group. 2 teachers. Advance business ideas
- Led by CEC & IIEE. Involved LU staff also from LUIS, Sten K Johnsson, Nano-consortium, EHL, LTH.

Summer school reflections

- Good & engaged students
- Well-appreciated course
- Thanks LU staff involved!
- Considerable resources available for mobility & expenses
- LU to fund course coordination and teacher involvement

Climate KIC & LU Education

- Networking
- Attractive opportunity for students: summer school, KIC label (several masters at LU that would be suited) & support for business ideas
- Not directly for student recruitment though
- Involves various parts of LU
- Needs a budget line

Other reflections

- Can this help engage “non-climate” students, eg entrepreneurship, business, engineering?
- Needs active involvement - and clever mgt - to make use of KIC events and courses. Might need an internal LU initiative of some sort

Climate does engage students!
